ATT:  
To whom it may concern

**Subject: SiRFstar4 based products 2019-Apr-06 Week Rollover results**

The GPS time scale (used for expressing satellite positions) is made up by counting weeks, and seconds within a week. There are no leap seconds.

The GPS week number as transmitted by the satellites in the navigation message is a ten-bit (shortened) count in the range 0-1023, repeating every 1024 weeks.

Cycle 0 (GPS week 0000) began 1980-Jan-06 00:00:00 UTC  
Cycle 1 (GPS week 1024) began 1999-Aug-21 13:59:47 UTC  
Cycle 2 (GPS week 2048) begins 2019-Apr-06 at 23:59:41 UTC.

Telit, being the manufacturer, hereby declares that these product families-based Qualcomm SiRFstar4 had been tested.

- J-F2 Flash
- J-F2 ROM
- J-F2 EEPROM
- J-N3 Flash
- J-N3 ROM
- J-N3 EEPROM
- SE880

See below the 2019-Apr-06 Week Rollover Verification Testing Results for the associated part number for each product families
